

**canadian puregas  
equipment limited**

## DISTRIBUTION PANEL

- **REGULATOR AND GAUGE OPTIONAL**
- **STANDARD TEN COLUMN FLOW BLOCK FOR VISUAL READINGS**
- **23" PANEL RACK/WALL MOUNT, 3/8" OD PLASTIC COMPRESSION OUTLET FITTINGS.**

**Canadian Puregas distribution panels provide a centrally located source for monitoring, measuring and recording airflow delivered to individual cables using individual flow rate indicators. A demi-valve for shutoff prevents excessive overflow.**

DP23-10-0-R - Panel with ten-column flow block only.

DP23-10-1-R - Panel with ten-column flow block and demi-valve.

DP23-10-2-R - Panel with ten-column flow block, demi-valve and pressure gauge.

DP23-10-3-R - Panel with ten-column flow block, demi-valve, gauge and regulator.

DP23-10-4-R - Panel with ten-column flow block, gauge and regulator.

For other options use the following ordering code:

For 19" width panels substitute DP19 for DP23.

For flow blocks other than 10 column substitute the number 10 with 1, 3, 5 etc.

For wall mounted panels substitute the letter R with the letter W.

Example: for a 19" wall mounted panel with a 5 column flow block and demi-valve

Order number is DP19-5-1-W

Also available with 1/4" OD plastic tube compression fittings.
