MODIFIED PANELS

FIELD TRANSDUCER KITS

Field transducer kits were developed to replace gas meters in pipe alarm meter panels and exchange panels with flow transducers of 0-20 SCFH, 0-50 SCFH or 0-100 SCFH ranges.

- Ohms test point reading on front of panel.
- Monitor high flows to air pipe.
- Monitor secondary flow to exchange cables.

- All kits supplied with mounting hardware and tubing. A modified panel is included for converting a five column flow block panel to include a flow transducer.
